

III Escuela de Invierno y VII Taller de Ecología Microbiana III Winter School and VII Workshop in Microbial Ecology

December 19 to 21, 2022

La Habana, Cuba

Report

The **III Winter School and VII Workshop in Microbial Ecology** was in The Convention Center at the University of Havana between December 19 and 21, 2022.

The call of the workshop was divulged by Microbial Ecology Research group from the School of Biology, Biochemistry and Molecular Biology Session from Chemistry Cuban Society, Cuban Society for Microbiology and Parasitology, University Network of Biotechnology and Biomedicine and Agromicrobios-Cuba Network (Annex: Call).

In the School, sixteen prominent professors and researchers from eleven institutions belonged to three countries were participated. The honorable contributions of prestigious researchers from other countries were in attendance. They are from France, Belgium and Spain. The Spanish professors teach their conference on line. Twenty students were participated in the school, and 15 of them were presented their contribution in the workshop. The students presented their research results in oral short presentation form with the presence of the several professors of the school and other from Microbial Ecology Research Group. The workshop as part of the Winter School was fruitful because the expositors showing their results in different topics in microbial ecology. This workshop allows extend the relationships among different research centers and university in different thematic of Microbial Ecology.

Different exchange meeting were develop during the event. Te exchange permit the presentation of a new project application among three institutions (UH, INCA and HPHE-Condorcet) and a visit of foreign professor to INISAV Institute.

The ISME funding was used to support the logistic of the school, specifically materials, meals during the three days of the sessions for participants in the workshop. The ISME logo was used in the call of the workshop, the certificate of attendance, the opening of the workshop and the ISME work was divulged during the event. You can find enclosed to this abstract of the results of the school-workshop different used material such as: call, scientific program, certificate of attendance, as well as several pictures.

Three awards for the best works presented by students in the workshop were released. The professors participated in the selection. The three awarded students were: Lilivet Díaz (UH), Amaia Ponce (INISAV) and Adrian Salcedo (UH).

The III Winter School and VII Workshop was evaluated as fruitful and with high scientific rigor and level by the participants. It was an excellent space for young people training and learning in science activity in the field of Microbial Ecology.
